

Leaders & Orgs Want

- Engaged, Resilient Workforce
- Continuous Reskilling, Unlearning
- Embracing AI, Agents, Robots... Quantum
- Higher Productivity
- Human Superpowers

**No Amount of Hustle
Can Outpace an Algorithm**

The Adaptation Problem

1. AI: Time, Not Knowing What's Possible, Where to Start, Tailored Value, AI Slop
2. Learning: Curiosity, Beginner Mindset Grit, Unlearning Old Habits
3. Identity: "I Am What I Do," Fear, Resistance to Change

It's not just a productivity crisis. It's a purpose crisis.

Upskilling for AI and adaptability is how you solve it.

Only 18%

of employees feel their
job aligns with purpose

Gallup, 2025

THE CRISIS

5.6x

more likely to be engaged
when work has purpose

Gallup, 2025

77%

of employees say learning new
skills
gives them a sense of purpose

TalentLMS Upskilling & Reskilling Report, 2024

89%

of workers fear AI will
make them obsolete

Resume Now, 2025

THE PROOF

144%

higher trust when given
hands-on AI training

HBR/Deloitte, 2025

THE COGNITIVE JOURNEY

~~"My organization needs to change"~~ → **"I need to change first"**

~~"I'll delegate this"~~ → **"I'll model this"**

~~"Someday"~~ → **"Monday"**

THE COGNITIVE JOURNEY

~~"I've read about this"~~ → **"I've done this"**

~~"AI is impressive/scary"~~ → **"AI is a tool I can direct"**

~~"My people need training"~~ → **"My people need permission and practice"**

Is this happening
to me or for me?

Evolve

“Failure is the limit
of my abilities”

FIXED MINDSET

“I stick to what I know”

“When I’m frustrated, I give up”

“Feedback and criticism are
personal!”

“I resist challenges”

“I enjoy trying new things ”

GROWTH MINDSET

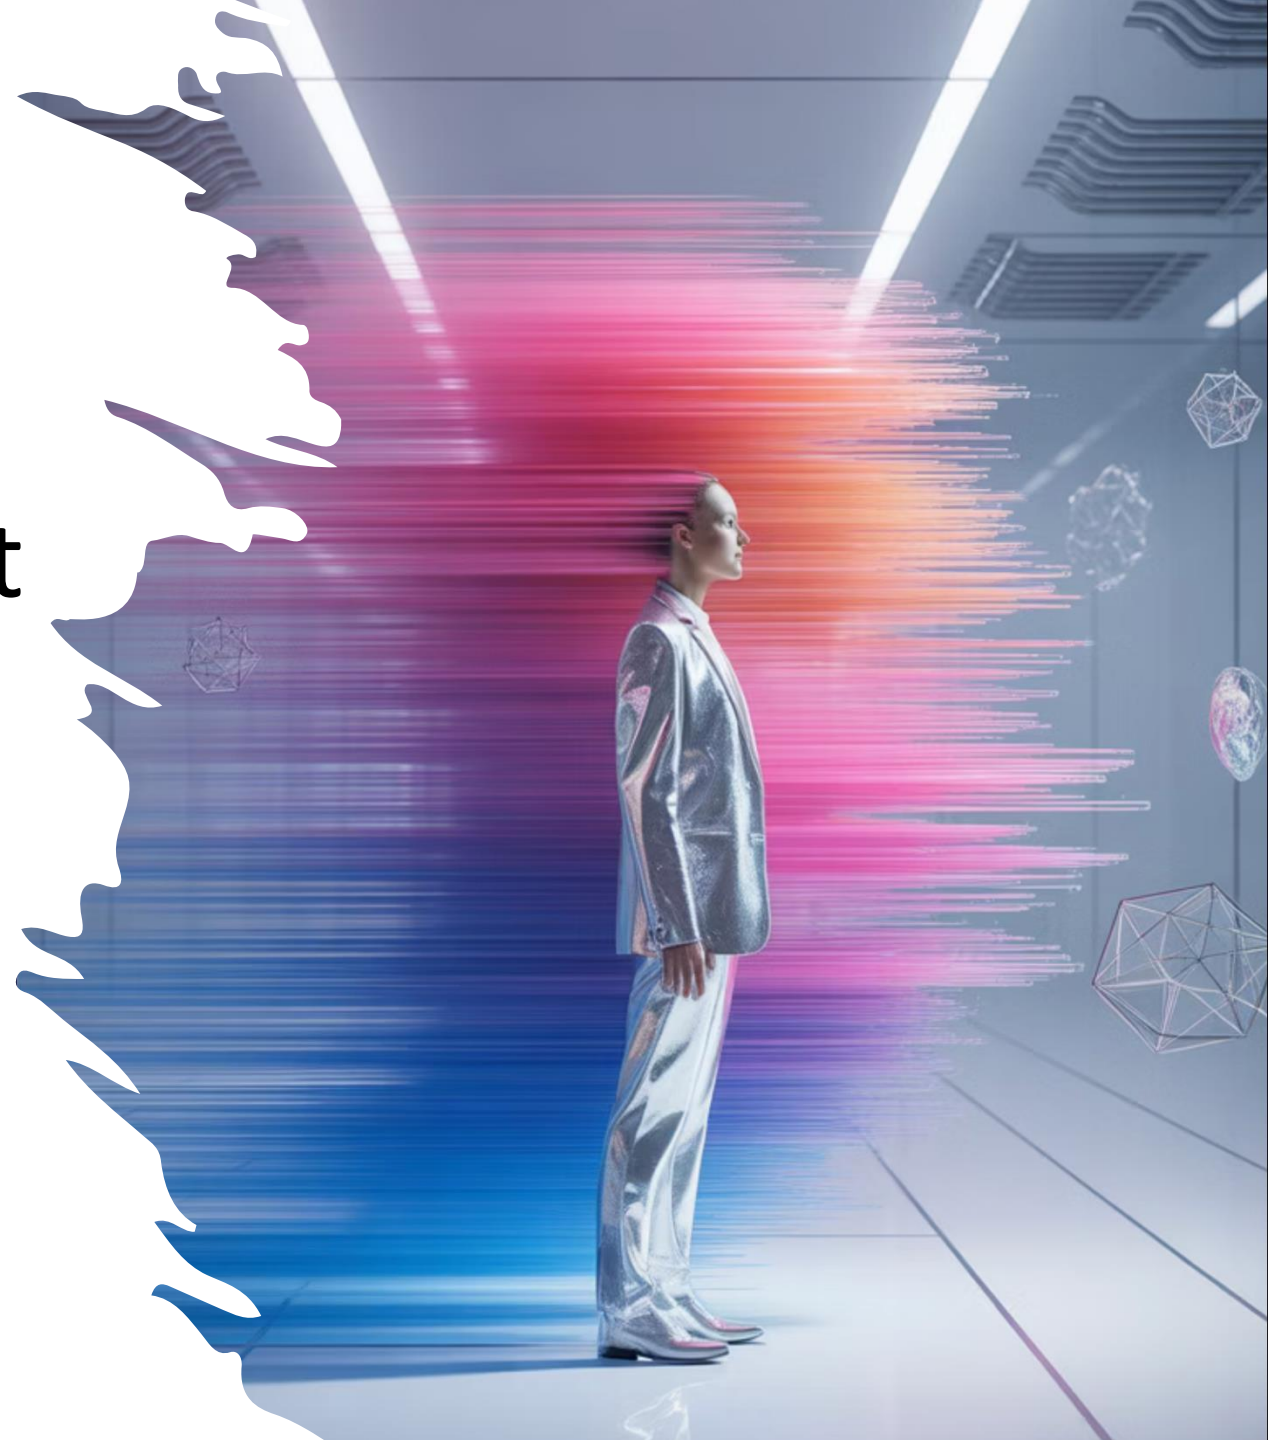

“Failure is a growth opportunity”

“My effort and attitude determine
outcomes”

“I learn from others and ask for help”

“I experiment to grow”

The Growth Mindset For The AI Era

Dweck taught us our abilities aren't fixed.
The AI era teaches us our role isn't fixed.

Before:

$$\text{HumanSkill} \times \text{Effort} = \text{Value}$$

Now:

$$(\text{HumanJudgment} \times \text{AICapability})^{\text{Collaboration}} = \text{Exponential Value}$$

“My value multiplies when I orchestrate AI's capabilities with human judgment”

Mindset Shift: Overcoming Five Fatal Blocks

The Excuses That Kill Careers

"I Don't Have Time"

Reality Check: You don't have time NOT
Companies using AI report 47% gains (PwC, 2024)

Action: Start with 15 minutes daily. That's 1%
That's 1% of your day for 47% potential gain

"AI Will Replace Me"

Reality Check: AI + Human outperforms
alone by 23% (MIT, 2024)

Action: Focus on AI-augmented, not AI-
replaced

"It's Too Technical"

Reality Check: Modern AI tools are
for non-technical users

Action: Start with ChatGPT or Claude. No
No coding required

"My Industry Is Different"

Reality Check: 87% of industries show
productivity gains (Accenture, 2024)

Action: Find three competitors using AI.
You're already behind

"Quality Will Suffer"

Reality Check: AI-assisted work shows
fewer errors when properly validated
(Stanford, 2024)

Action: Use AI for first drafts, human
judgment for finals

What work will AI do better than me?

What work will I do better with AI?

Productive Friction: AI as Learning Partner

Unproductive AI Use

- Outsourcing thinking completely
- Copy-pasting without critical evaluation
- Using AI to avoid learning core concepts
- Accepting outputs without verification
- Relying on AI for ethical judgments

Productive Friction

- Iterative human-AI collaboration
- Critical evaluation of AI outputs
- Using AI to accelerate learning
- Challenging AI assumptions
- Applying human ethics to AI suggestions

A silhouette of a woman with a ponytail, looking upwards. The background is a dark blue gradient with a large, abstract, light blue and purple shape behind her head. The text is overlaid on this shape.

In a world of algorithms, people still matter most.

Unlock human potential and AI
synergy in the age of disruption.

Hmn Superpowers 2026

Hmn Superpowers.

1. **Leave fingerprints.** Authenticity is your edge in an algorithmic world.
2. **Build trust that compounds.** Your network is your moat. AI can draft the email – it can't have dinner with the LP
3. **Tell stories that stick.** Create meaning, not just information.
4. **Spot what others miss.** Find the context your computer can't see.
5. **Read the room.** Presence, body language, knowing when to push and when to listen. That's what closes deals.
6. **Ask questions AI doesn't ask.** AI asks questions from patterns, not from gaps.
7. **Trust your taste.** Know what good looks like. AI generates volume — you curate quality.
8. **Be the one who gets it done.** Everyone has AI, not everyone can execute.
9. **Empathize beyond algorithms.** Be the person someone trusts more than AI.
10. **Protect your reputation.** Integrity is a competitive advantage. One AI-generated mistake with your name on it can cost you years of trust.
